

HTML Comprehensive Notes

Level 6: Multimedia (Audio/Video)

Embedding Multimedia

Use the <audio> and <video> elements for audio and video playback respectively. Include multiple sources for compatibility.

Fallback Content

Provide fallback text or elements for browsers that don't support the multimedia tags:

html

Copy code

<video>

 <source src="video.mp4" type="video/mp4">

 Your browser does not support the video tag.

</video>
